

2 **AMENDMENTS TO THE SPECIFICATION**

3 Please change the title of the application from

4 "Jet Mill"

5 to "Jet mill comprising pressure resistant outer casing enclosing abrasion resistant inner casing"

6 Please replace the paragraph on page 8 lines 2-7 with the following paragraph

7 Figure 1 shows a top view of the jet mill according to the invention, with particle
8 feed (1) and injector gas feed (3) into the pulverizing chamber (7), as well as the
9 centrally located product discharge (2). The propellant feed (4) is located at the edge,
10 passing through the outer casing (13, 14) into the propellant duct (5). The side wall of
11 the pulverizing casing, the pulverizing casing ring (8), is provided with drilled holes (6)
12 for feeding the propellant into the pulverizing chamber (7).
